

Never Lose Another Asset

With Sani nudge Asset Tracking

Lost, stolen and underutilized hospital equipment is one of the largest uncategorized expense in hospitals. With Sani nudge Asset Tracking, hospitals can reduce theft, stop unnecessary purchases and rentals, and eliminate wasted staff time.

€19K SAVED

Your hospital can save €19,000 over 6 months purely from locating lost telemetry modules.

37HRS GAINED

In one month, a BioMed Director at a hospital saved 37 hours he normally spent looking for assets

€1M LOST

Lost or stolen equipment costs an average hospital over \$1M every year.

+40%

Equipment is underutilized +40% due to the difficulty in locating materials, leading to unnecessary additional purchases and delays.

OUR SOLUTION

- Eliminates spend on lost items, rental expenses, and unnecessary equipment purchases.
- Frees employees to care for patients instead of wasting time locating assets.¹
- Ensures annual maintenance is conducted on all equipment, creating a safer environment for patients.

PRICE
